

Product number/ REF:
10-002

Manufacturer:
Icentia Inc. 2750, Einstein, Quebec, QC Canada G1P 4R1

Description

The OFIX medical device is a circular adhesive tape that helps improving long-term adhesion of ECG electrodes commonly used with ECG recorders. It is intended to be used on patients who require ECG recording.

The OFIX medical device is intended to be applied on new ECG electrodes prior to initial application of an ECG recorder or when ECG electrodes must be replaced. The use of the OFIX medical device may include shaving, cleaning, and lightly abrading the application site on the patient.

Instruction for use and product safety information

OFIX is a Class I device that can be used safely without any specific instructions by following application pictograms.
